

“Susan’s EQuIS experience, combined with her background in software development, client-centric approach and bilingualism make her a great addition to our EarthSoft Systems Engineering team.”

EarthSoft CEO, Mitch Beard

EarthSoft, Inc. is pleased to announce the recent addition of Susan Healey to our Systems Engineering team.

Susan brings more than 20 years’ experience in the environmental software industry and has specialized database experience, having provided development services for clients using both SQL Server and Oracle.

Prior to her role as an EarthSoft Systems Engineer, Susan worked as a software developer and database administrator where she focused on customizing EQuIS to meet the needs of EQuIS users and building add-on tools.

Susan is also fluent in Spanish and has extensive experience working with environmental industry counterparts in Latin America.

Susan graduated from Dartmouth College with a bachelor’s degree in Spanish, combined with an emphasis in biology , chemistry and physics coursework.

Susan balances her professional career with active participation in cycling and skiing activities. She is a former road and mountain bike racer and a current Nordic skiing coach, as well as a senior-level National Ski Patrol member and instructor .

EQuIS Highlights

- ▶ Served as an EQuIS software developer during earlier employment with EarthSoft.
- ▶ Successfully negotiated EQuIS services work for Pioneer Natural Resources, as well as for Shell Canada together with Earthsoft business partner SGS.
- ▶ Minnesota PCA Account Manager responsible for supporting Oracle database with 16+ million records
- ▶ Prior experience supporting EQuIS implementations for environmental consultancy to meet varied client needs
