

“Eric is a tremendous asset to EarthSoft’s Training Group and offers expert knowledge of EQUS Live, EQUS Sample Planning Module (SPM) and EQUS Data Gathering Engine (EDGE) software.

Eric consistently takes on new challenges to provide high-quality EQUS training to EarthSoft clients, as well as to enhance training content and structure.”

EarthSoft Training Director, Emily Mulford

EarthSoft, Inc. is pleased to announce selection of Eric Anderson as the December 2016 EarthSoft Staff Member of the Month.

Located in the Salt Lake City area, Eric began his career with EarthSoft in 2012 as a member of the Help Desk Department. He is assigned to provide technical support for EQUS Live, SPM and EDGE products.

Eric is also a member of EarthSoft’s Training Group and is responsible for providing online and on-site training to domestic and international EQUS clients.

EQUS Training Highlights

Eric recently provided key online training sessions for two international clients.

In early December, he provided online EDGE training for Golder Associates in Australia to support the roll-out of Ford Motor Company pilot projects.

Later in December, he also provided EQUS Live online training for a new EarthSoft client in North Africa. In both cases, Eric displayed flexibility and responsiveness to meet client schedules and requirements which necessitated working well

outside his normal schedule. He has also provided instrumental post-training follow-up communication to ensure new clients’ understanding of EQUS use and operation.

Education

Eric earned a bachelor’s degree in biological engineering from Utah State University in Logan, Utah. While a student, he served as a research assistant and supported various projects, including Utah State’s International Genetically Engineered Machine (iGEM) team.
