

EQUSTM Collect

The Premier EQUS Field Data Collection App

Field Data Collection

Simple. Efficient. Real time.

EQUS Collect is a mobile field application for collecting environmental and geotechnical data on your phone, tablet, or PC. Use EQUS Enterprise to build and publish field data collection forms. Collect, verify, and enforce data integrity in real time.

Features

- Works on smart phones, tablets, and PCs (iOS, Windows, Android)
- Subscription licensing
- Manage forms and users with Enterprise dashboards
- Build templates and forms with advanced logic
- Simplify data collection workflows
- Intuitive user interface
- Forms using any EQUS formats
- Support georeferenced data (map views)
- Supports live connection to multiple data loggers and probes
- Synchronize data between multiple field staff
- COC and eCOC reports
- View status of forms and data in real time
