AND MORE!

Anniversary
earthsoft

EarthSoft has focused exclusively on environmental data management innovation for 30 years! While this anniversary is a tremendous accomplishment, EarthSoft has broadened the EQiS product line and continues developing new data management solutions in response to our clients' growing and evolving data requirements.

Mitch Beard
EarthSoft Chief Executive Officer

EarthSoft Celebrates 30 Years of Data Management Success

EarthSoft, Inc., a global leader in environmental and geotechnical data management systems and decision support software, celebrates three decades of continuous operations and innovation with its flagship EQiS software. EarthSoft is operating in the United States, Canada, Australia, Manila, and elsewhere.

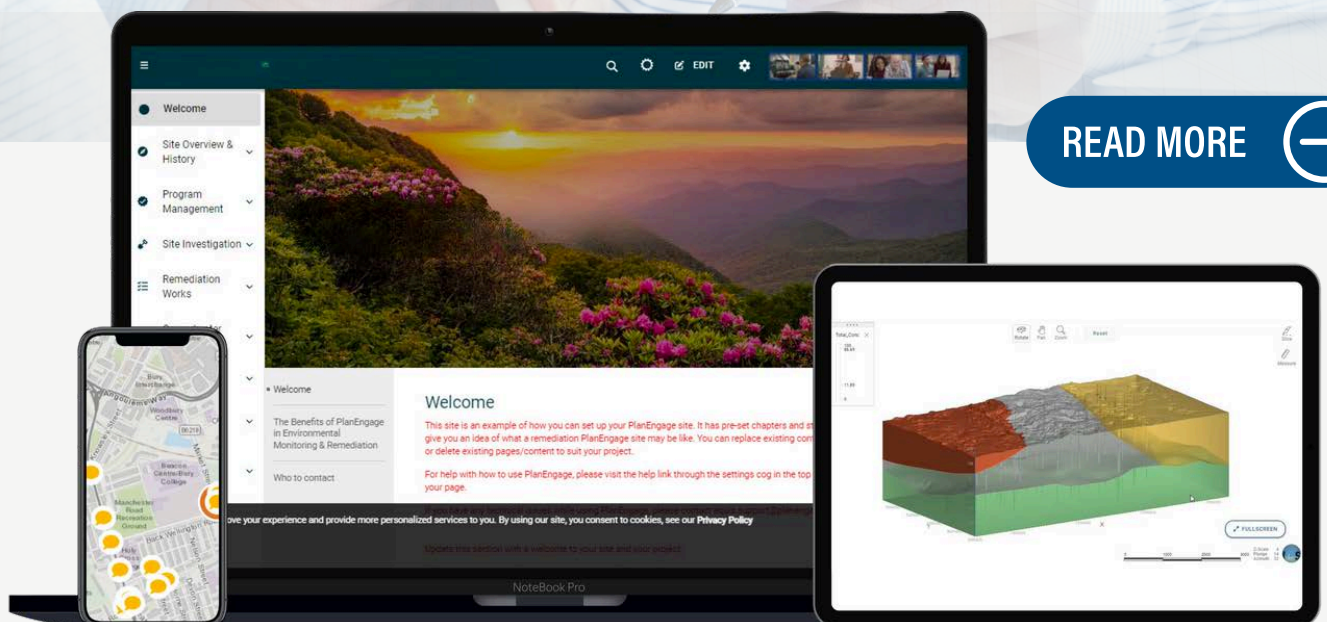

EarthSoft has been continuously innovating around its EQiS software since 1994, spearheading a technical data management revolution with a series of EQiS software modules integrating environmental project data collection, verification, visualization, analysis, and reporting. EQiS today provides much more than environmental database functionality and offers an integrated set of modules implementing seamless automated environmental and geotechnical data management and workflows.

Improve decision-making and create a secure, accurate, and accessible single source of truth. Gain a comprehensive understanding of your projects by extending traditional charts and graphs. Bring your data to life with dynamic GIS and a wide variety of interactive tools accessing and visualizing disparate information! Create critical insights, enable seamless collaboration, and bring value by telling data stories with EQUS, GIS, and PlanEngage.

Brings Life and Value to Disparate Data

Eurofins Environment Testing US (EET US) joins EarthSoft Business Partner Program

EarthSoft partners with laboratories as part of our Data Governance Initiative and to support the increasing demand for the digitalization movement in the industry. We are pleased to have the largest global laboratory network join our Business Partner Program to support these efforts.

“The formal collaboration by environmental industry leaders in software, laboratory testing, and consulting working together to make a digital approach to long standing data workflows come to fruition is new and exciting”, said EarthSoft Vice President Dan Alexander. “EarthSoft is grateful to our new partner, Eurofins Environment Testing, for joining the Business Partner Program to help move our data governance initiative and digital data strategy forward. Thanks to Brian Williams and his team for making this commitment to partner with EarthSoft and the rest of our business partners in our efforts to improve environmental data management for our shared clients and the industry as a whole.”

[Business Partner Program](#)

Eurofins Environment Testing businesses in the US are proud to be one of the first laboratories to formalize participation in the EarthSoft/EQULS Business Partner Program. EET businesses are committed to digitalization, streamlining processes, enhancing data security, and promoting seamless transfer of data from project inception, through planning and field collection, laboratory processes, and finally back to end user clients with exceptional controls on data integrity and process. The foundations of an exceptional partnership between the leading provider of Environment Testing, and a leader in Secure, Efficient and Seamless Data Management.

– Group Executive Vice President, **Brian Williams**

EarthSoft Staff Spotlight

“Brian started at EarthSoft ten years ago as our first person focused exclusively on software QA. His interesting and atypical career path, both prior to and at EarthSoft, shows his versatility and technical aptitude. He has been successful in each of his roles here at EarthSoft, including QA, Product Team Coordinator, Team Manager, and Support Group Director. He is an inquisitive and technically astute problem solver, a diligent advocate for customers and colleagues, and an admirable and empowering leader. We are grateful to have Brian on the EarthSoft team.”

– Mat Weaver, CTO

Brian Bingham
Director - Support Group

Thank you, Brian, for your contributions to EarthSoft!

AGS Data Format

EQiS Geotech supports various data exchange formats, enabling collaboration amongst geotechnical/geoenvironmental industry professionals.

EarthSoft is proud to be part of the AGS Data Format group.
